Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 13, 2008 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clear what structure is set forth by "at least one transverse folding area". Figure 24 shows a transverse fold defined by a weakened line, lines 8 and 10, "said transverse fold" lacks positive antecedent basis.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 7, 9, 13-14, and 19-21, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over FR 2,550,170 (hereafter '170) in view of Snow (US 4,241,627).

'170 discloses the invention substantially as claimed including a box structure having at least one vial-breaking tool comprising a strip of cardboard wherein the strip having a transverse folding area forming two leaves. (e.g., Figure 1). '170 fails to disclose the strip of cardboard defining a hole in a center positions. Snow teaches a vial-breaking tool with a hole (e.g., 30). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a hole as taught by Snow on the device of '170 in order to facilitate breaking of larger size vials. Regarding claim 14, the appendage is folded over at least twice (e.g. at 210). Regarding claims 19-21, the modified device of '170 discloses the invention substantially as claimed except for two closing flaps and the strip of detachable tools being connected to one of side walls. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify to provide flaps and to connect the strip to one of the side walls on the modified device of '170 since the examiner takes Official Notice on the use of flaps as old and well known in the art for the purpose of connecting two walls to form a box and forming a box structure integrally with vial-holding structure as old and well known in the art for the purpose of ease manufacturing.. Regarding claim 21, a lid (e.g., 101).

Response to Arguments

6. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 571-272-4504. The examiner can normally be reached on Monday-Thursday 9:00-5:30.
